

18

years

Metal Forging specialist

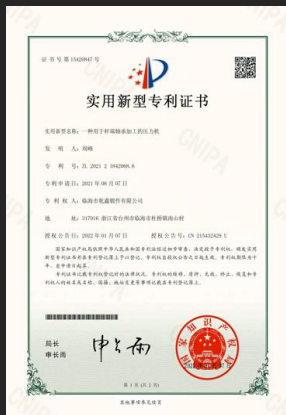

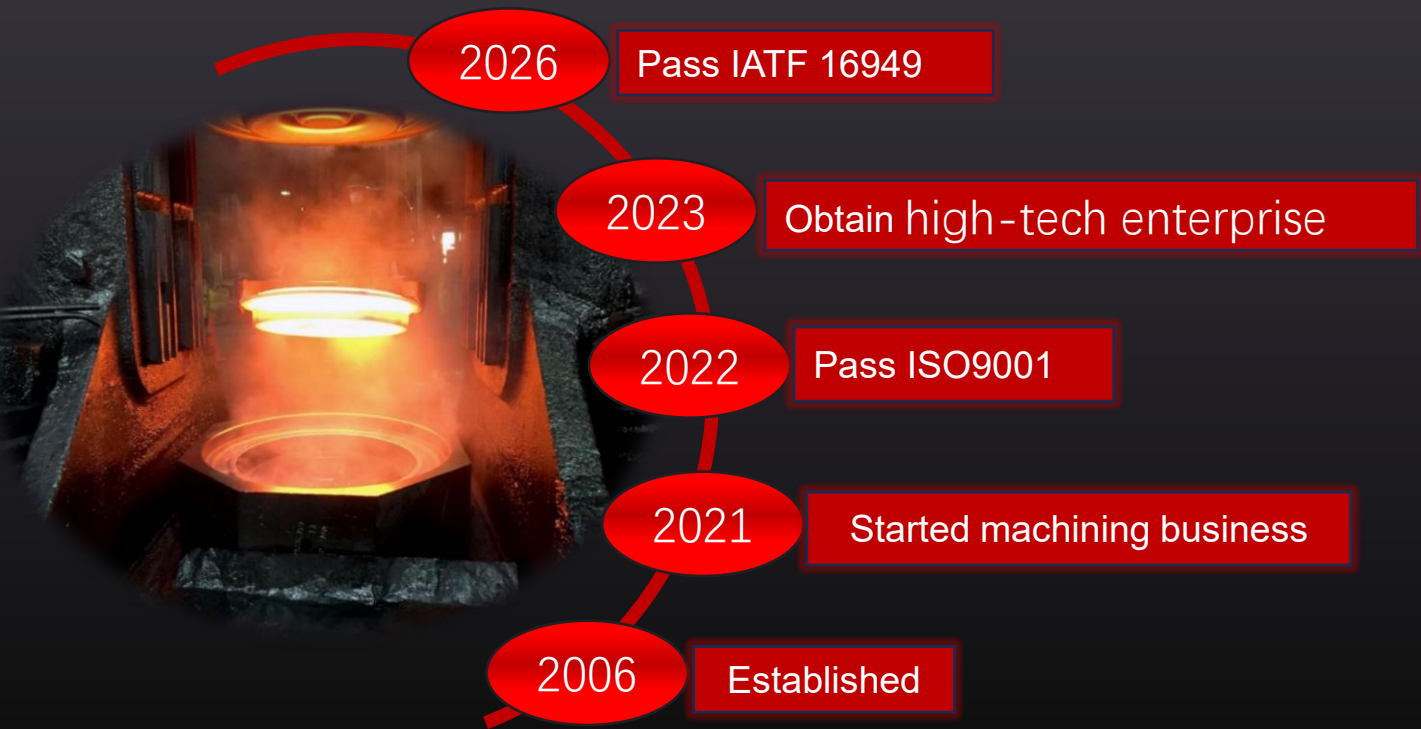

- **Copper** -

- **Aluminum** -

- **stainless steel** -

Milestones & Awards

Core competitiveness

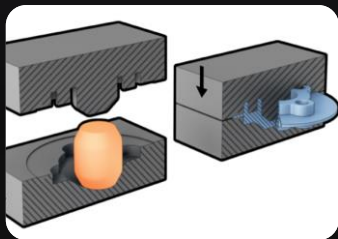

Integrated forging parts processes in house

- From mould design to finish parts
- Press from 160Ton – 1600Ton
- Machining facility

Know-how on forging technology

- Early involved with customers & design change proposal
- Machining feasibility study, optimize part cost

Fast sample

Cold extrusion

Hot forging

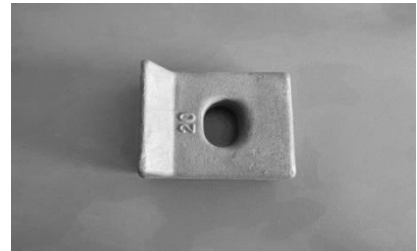

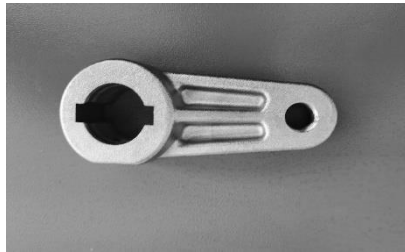

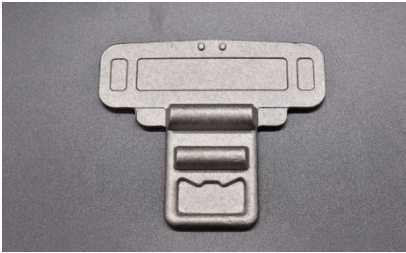

Machining

Representative parts

Stainless Steel

- Automotive flanges / arms
- Home use components

Representative parts

Carbon Steel

- Automotive flanges
- Hydraulic valves
- Mining machinery

Representative parts

Alloy Steel

- Automotive brackets
- Hydraulic valves
- Mining machinery

Representative parts
